

TWINCAT 15 15

TWINEX®

A new technology and intense feelings...

Program

The Twincat 15 is specialised on 3 facts: Performance, ecology and resistance.

Performance

Thin hulls for good upwind performances, non-drifting plan well centred for easy tacking, a good distribution of volume for a secure sailing, ergonomic handles for transport and non-slip pads for comfort on trapeze.

Ecology

During the production process there are no toxic products emissions. Hulls are 100% recyclable.

Resistance

The Twintex® has better technical and resistant characteristics than other materials used until today for light leisure sailing. This boat is built in Twintex® to ensure an important shock resistance, increase the rigidity, decrease the weight and respond to the future standards of construction in terms of recyclability...

The Twincat 15 is the first catamaran in Twintex® conception, which is intended for private individuals, sailing schools, hotels and holiday clubs.

For more sensation, let you conquer by the Xtrem version!!!

Standard version

240g Dacron Sails with reefing points
Grey mesh trampoline
Ball bearing mainsheet traveller
5:1 mainsheet system 1
Twin trapeze
Automatically lifting rudders
Front and rear carrying
Covering non-slip

Sport Version

in replacement...
Mast 7.30 m
Main sail 12m²
Jib 3.10 m²
Spinnaker (option) : 12m²

Xtrem Version

in replacement...
Monofilm sails
Adjustable trapezes
Spreaders
Black blades rudder
Black mesh trampoline
double cunningham
cleat swivel

Options

Furling jib
Spinnaker kit
Snuffer spinnaker kit
Head Mast buoyancy

Technical information

Length: 4.60 m
Width: 2.30 m
Weight: 125/130 kg
(std version/sport version)
Height of mast: 6.50 m / 7.30 m
(std version/sport version)
Sail area (std version)
Mainsail : 9 m² / jib : 2.4m²
Spinnaker: 9 m² (option)
Rating (sport/Xtrem version) : 1.241
Certification : C 3 / D 4
Maxi weight: 320 kg
